

Summary of the Mitigation plan.

For the preparation of the mitigation plan the team of SZREDA and the local partners used the methods described in the chapters of the MiSRaR Handbook.

Chapter 1

In the first chapter is composed by a short summary of the two projects “MiSRaR” and “Prisma”, describing the local working group and the main principals and policies for risk mitigation and prevention.

Chapter 2

Right after that the partners describes the vision, the mission and the main goals of the mitigation plan.

Chapter 3

In the third chapter is presented the legal framework on risk mitigation in Bulgaria.

Chapter 4

In the forth chapter is described the results from the risk assessment including:

Risk Identification;

Risk analysis;

Risk evaluation;

Chapter 5

In the fifth chapter of the mitigation plan is present the results from the capability assessments. In this part of the plan is presented the results from the “FTA”

analyses which are the identified measures necessary for implementation. As well with the measures in this chapter we also described the people and the institutions responsible for reaction in case on disaster, and we also present the results and the recommendation of the CBA.

Chapter 6

In this chapter we described the all the resources available to the Region of Stara Zagora for prevention and acting in case of disaster. In this chapter we also provide the information about human resources, technical equipment and also the responsibilities of the Municipality and the Region of Stara Zagora in case of disaster.

There is also information about the funding of the mitigation measures in this part of the mitigation plan.

Chapter 7

In this chapter we provide information about the monitoring of the implementation of the plan. We also put some recommendations and conclusions about the risk mitigation process in general.

Chapter 8

In this chapter we present the ways and principals for actualization of the plan.

In conclusion we put the information about the connections between the local partners and how they cooperate with each other.
